

Teacher Access Center

From taking attendance and handling discipline issues to educating students and grading assignments, a teacher's day can be filled with many responsibilities.

Teacher Access Center is a classroom management system that can help teachers accomplish their daily responsibilities with ease. Teachers can quickly access essential information and processes, communicate efficiently with parents and school administrators, and utilize an integrated industry-leading gradebook all in one place.

Robust Information

- **Easy-to-Access Student Data.** View essential student demographic and performance information such as schedules, medical records, and contacts. Quickly retrieve transcripts, assessment scores, Student Success Plans, IEPs, discipline history, and attendance.
- **Dynamic Searching.** Student search with "soundex" functionality quickly connects you with the right information, even if you're unsure of the spelling of a student's name.
- **News You Need, When You Need It.** Select from a long list of available notifications, designate any watch lists to focus on, and specify how to receive notices viewable right on your **Teacher Access Center** home page.
- **Not Your Typical Attendance Sheet.** Combine seating charts with photo attendance—ideal at the beginning of a school year and for substitutes.

The home page shows essential information such as schedules, attendance and grading information, issues, important school news, and more.

Efficient Time Management

- **Modern User Interface.** Access the information needed to manage and organize day-to-day activities—class schedules, news and notifications, and essential links and reports.
- **Multitasking Tool.** Take attendance, update student grades, communicate and schedule meetings with parents and administrators, access reports, submit a behavior referral, review an IEP, and connect to performance data.
- **Easy to Learn, Easy to Use.** Intuitive navigation and icons allow you to hit the ground running in **Teacher Access Center**. Online help and e-Learning self-paced lessons are available right within the system.

The gradebook shows unique alerts, grades, performance indicators, and specific assignment details.

Industry-Leading Gradebook

- **Time-Saving Features.** Rapidly add new assignments, easily weight the grade, score with a rubric, and add attachments—all without ever having to navigate away from the page. Effortlessly copy assignments to other classes and move from one course to another.
- **Your Data, Your Way.** Configure columns to view important details and filter content to access and analyze specific information. Assignments are color-coded for quick reference and the student's name or I.D. is always visible.
- **Grading in a Snap.** Rapidly enter—and even mass-load—scores and add comments with ease. Manually enter grades and extract from the gradebook with one click, and generate interim progress reports for all students or an individual student.
- **Standards-Based Gradebook on Demand.** Quickly switch to a standards-based gradebook mode to view how scores are affecting competency marks. The system features support for Power Law.
- **Added Functionality.** Import scores for transfer students from other gradebooks and walk-in grades for new students. In addition, read-only access can be authorized for administrators to enable them to access vital information.

Efficient Communications

- **Manage Submissions.** Effortlessly submit your attendance and be reminded automatically if you forget. Quickly report a discipline problem or refer a student to a success plan manager.
- **Partner with Parents.** Share news, access contact information, and send an email to a parent or to a group. From the gradebook, easily post comments about student performance, classroom activities, and assignments for viewing in [Home Access Center](#).

“Our staff’s eyes have really been opened in terms of what a robust student information system can do. We definitely have more information at the fingertips of more staff. It really helps support student learning.”

Stan Gorbatkin

Assistant Superintendent of Technology Services
Indian Prairie School District 204, IL

eSchoolPLUS
